Profile

I am a software engineer with expertise spanning React, Next.js, Node.js, Express, MongoDB, SQL, Prisma, GraphQL, REST... My career highlights feature the successful delivery of scalable web applications that exceeded client expectations and elevated user engagement. I excel in solving intricate challenges, collaborating across teams, and adhering to project timelines. Committed to ongoing learning and possessing strong communication skills, I offer valuable contributions to organizations seeking to enhance their development endeavors .With me on board, you've got a wizard in your corner! :)

Employment History

Software Engineer, Pabau Clinic Software, Prishtina

JULY 2022 — SEPTEMBER 2023

- Led responsive design implementation, optimizing user experience on diverse devices and driving elevated accessibility and engagement.
- Collaborated with cross-functional teams to deliver innovative features, including a robust two-factor authentication and streamlined verification login, enhancing user security verification login feature, enhancing user security and streamlining the login process.
- Leveraged React, Next.js, TypeScript, and GraphQL to architect scalable frontend components, fortified by contributions to backend development with Nest.js, Prisma, and PostgreSQL for holistic solutions.
- Thrived in Agile settings, consistently meeting deadlines while multitasking efficiently.
- Advocated Test-Driven Development via unit tests using Jest, bolstering code quality.
- Employed Cypress for comprehensive end-to-end tests, validating functionality and flows.
- Manipulated cache effectively by updating cache on mutations, refetching queries when necessary, and optimizing data fetching strategies for improved performance.
- Active in code reviews, elevating quality and maintainability.
- Consistently met project deadlines, adaptable and results-oriented, navigating fast-paced development and prioritizing milestones effectively.

Software Enginner, Freelancer

JUNE 2021 — JULY 2022

During my freelancing period, I worked as a software engineer. As a freelancer, I had the opportunity to work independently, offering frontend and backend development services. I developed custom web applications using modern frontend technologies such as HTML, CSS, and JavaScript frameworks like ReactJS. Additionally, I created and maintained backend systems using server-side technologies such as Node.js, Express, and databases like MongoDB, MySQL, PostgreSQL.

Education

Computer Science and Engineering Bachelor, University of Business and Technology, Prishtina

OCTOBER 2019 — SEPTEMBER 2023

At the University of Business and Technology, I pursued a Bachelor's degree in Computer Science and Engineering, achieving a strong academic record while actively engaging in hands-on projects and collaborative coursework. I developed essential skills in problem-solving, teamwork, and project management, preparing me to excel as a software engineer in a dynamic and innovative industry.
